STIHL COLOR CODING	COLOR In order to facilitate the selection of the suitable mowing line, we have sorted our mowing lines by color. Once you have and the mowing line profile, it is quick and easy to buy the mowing line again.						
Mowing line, round		1.4 mm	1.6 mm	2.0 mm	2.4 mm	2.7 mm	3.0 mm	3.3 mm	4.0 mm
This high-performance mowing line can be used universally and is available in nany different diameters for all STIHL line mowing heads. Suitable for all rimming and mowing jobs and specially developed against fraying and fusing.									
Mowing line, round and low-noise he spiral grooves of the low-noise mowing lines considerably reduce wind oise. This mowing line is ideally suited for use with electric and cordless rushcutters due to the reduced noise level.									
Mowing I ine, square Due to the four edges, this mowing line is more aggressive than the round nowing line. Ideal for effective cutting of thick, woody grass and weeds.									
Mowing line, pentagonal The pentagonal mowing line combines the aggressive edges of the square mowing line with the wide range of applications of the round line. This makes he pentagonal mower line universally usable with a high cutting performance at the same time.									
High tech mowing I ine CF3 Pro The CF3Pro mowing line consists of three different plastics, each with different features. One layer contains carbon fibers for high stability, the others provide flexibility and sturdiness. In combination with the shape and the twist, the mowing line has an excellent mowing performance with low wear at the same time.							-		
DuroCut pieces of I ine Pieces of line cut to length for use with STIHL DuroCut mowing heads. The construction with a flexible core and a hard coating with cutting teeth ensures a ong service life and high mowing performance. For clean working in high, dense and slightly woody vegetation.				+			+		+
